STOCKPICKING IS A SKILL AND AN ART
– AND THEREFORE REQUIRES PATIENCE

MARKET REPORT | www.skagenfunds.com

2016 was an eventful year and most of SKAGEN's funds delivered positive returns. Please see our Market Report for the portfolio managers' comments on what happened in the various funds last year. You can find the market report here: www.skagenfunds.com/reports

SKAGEN seeks to the best of its ability to ensure that all information given in this report is correct, however, makes reservations regarding possible errors and omissions.

The report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of the report. SKAGEN recommends that anyone wishing to invest in our funds contacts a qualified customer adviser by telephone on +47 51 80 37 09 or by email at contact@skagenfunds.com.

SKAGEN Funds only has authorisation to market its money market funds SKAGEN Høyrente and SKAGEN Høyrente Institusjon and combination fund SKAGEN Balanse 60/40 in Norway and SKAGEN Krona in Sweden. Information regarding these funds is included in the official accounts and audited information hereto. The Annual Report 2016 was originally prepared in Norwegian. This is a translated version that is published with reservations regarding possible errors and omissions as well as erroneous translation. In case of conflict between the Norwegian and the English versions, the Norwegian version shall prevail. The Norwegian version of the Annual Report 2016 is available at www.skagenfondene.no.

Notice of electoral meeting in SKAGEN

ELECTORAL MEETING

8

MARCH

CLARION HOTEL ENERGY
STAVANGER

We would like to invite unit holders in SKAGEN Funds to our electoral meeting which will be held at the Clarion Hotel Energy in Madla, Stavanger on Wednesday 8 March 2017 at 6pm.

Agenda for the electoral meeting:

1. Election of chairperson and two unit holders to sign the minutes
2. Board of directors' annual report
3. Auditor's report
4. Election of one board member to the board of directors of SKAGEN AS
 - The election committee proposes that the current board member Martin Petersson be re-elected as unit holder-elected board member for a term up to 2019
5. Election to the nomination committee
 - The board proposes that the current member of the nomination committee Per Olof Höglund be re-elected for a term up to 2020
6. Voting

Voting

Unit holders in SKAGEN Funds may cast advance votes during the period from 20 February until 3 March 2017. You can obtain a voting slip by contacting Customer Services on +47 51 80 37 09. Advance votes may be sent by email to legal@skagenfunds.com, or by post to SKAGEN AS, P.O. Box 160, 4001 Stavanger Norway. Your units as of 3 March 2017 will constitute the basis for the calculation of the number of votes.

It will also be possible to vote at the meeting itself. In this case, you must register upon arrival, and at the latest by the time the meeting begins.

In the election, voting rights are adjusted so that unit holders with the same values are entitled to the same number of votes. Unit holders may vote by proxy. You may obtain an approved proxy form by contacting Customer Services on +47 51 80 37 09. Please remember to bring a proof of identity and, where relevant, a certificate of incorporation.

Funds discussion

After the formal part of the electoral meeting is over, there will be an information meeting and a discussion about the funds with some of the portfolio managers. Light refreshments will be served after the meeting.

You can find further information on our website www.skagenfunds.com or by contacting Customer Services on +47 51 80 37 09. The meeting is open to everyone.

Best regards
The Board of Directors of SKAGEN AS

Henrik Lisaeth
Chairman of the Board of Directors

Dear Readers,

While the history books will most likely associate 2016 with Brexit and Donald Trump, other less renowned events will have a much more lasting impact on the fund management industry.

As the outgoing Chief Executive Officer of SKAGEN AS, I would like to take this opportunity to say a few words about the industry that I have been a part of for the past 25 years.

One of the biggest investment trends since the financial crisis is the great investor rotation out of active investments and into passive ones. This trend continued unabated in 2016 and is expected to continue also this year. According to Morningstar quoted by MarketWatch, active funds saw outflows of USD 285.2 billion in 2016, while passive funds attracted USD 428.7 billion.

Moreover, this trend is set to continue, spurred on by changes in regulation as well as technological shifts in the fund management industry – all around the world. At the time of writing, just over one out of every three invested dollars in the world is in passive funds.

Two issues are worth noting: first, a highly fragmented European fund market has seen and will see even more regulation and integration in the coming years. The European Commission has stated that it will recommend that EU regulators investigate the asset management industry “to ensure more competition and better service for consumers”. Looking at the European fund landscape it is easy to agree that more integration and improved service is needed, particularly in Europe.

Second, in the past year, we have witnessed many large, global fund providers uniting to improve efficiency. In addition, platforms have boosted their market share as the preferred means of distribution for the future and automated solutions are now the vehicle of choice for investment advice to the mass market. Local fund providers are now competing in a global arena, and it is rare to find customers dropping by their local branches to top

up their savings.

The winners in the changing European fund industry will be those that can provide good long-term returns, customer-focused service and optimised distribution, all while maintaining a simple and understandable business model. This chimes well with how we work at SKAGEN.

Although the long-term effects remain to be seen, one point is clear: SKAGEN aims to be a part of the changes. We have in the past year appointed a dedicated Chief Investment Officer, Alexandra Morris, to head up the portfolio management team and we have set up an innovation team to make sure we keep up with the changes.

The next leg of the SKAGEN journey will be steered by Øyvind Schanke, who replaces me as CEO at the beginning of February. He comes to us with a deep belief in active management and sees the strong growth in index management worldwide as an opportunity for SKAGEN. Both the company and our clients should therefore be in capable hands as he works to ensure that SKAGEN remains a preferred provider of actively managed funds.

SKAGEN is a truly active fund manager. No sideways look towards the benchmark, no hiding behind the largest stocks or benchmark-tactics – blending in is not our business. SKAGEN is experienced and has a long tradition in active management.

These are some of the reasons why I joined SKAGEN, which has a team of some of the best portfolio managers in Scandinavia and a proven long-term track record.

Active fund management has been through a rough patch lately. Underperformance and outflow have been the norm in recent years and this trend continued in 2016. Amidst all the changes that our industry is experiencing, we at SKAGEN stick to what we know, namely stock picking.

– Leif Ola Rød
CEO

A skill and an art

Stock picking is both a skill and an art. Both are equally important and you cannot have one without the other.

– Alexandra Morris
Investment Director

The skill lies in the ability to use one's education and experience, and apply it to understand complex business cases, financial accounts and valuation methodology. It is the ability to look at all sides of the investment story, not missing any relevant opportunities or risks that may be pertinent to your conclusion.

The art lies in the ability to look into the future and understand the human di-

mension of the financial markets, existing portfolio companies and potential portfolio companies' management, board and owners as well as their customers' future likes and dislikes. The art also lies in the ability to take a bird's eye view of the world economy and make good decisions on a detailed company and portfolio level.

Combining art and skill is a potent cocktail. These are the ingredients of SKA-

GEN's success along with our value approach to stock picking, our unconventional methods of finding opportunities and our determination to provide our unit holders with the best possible returns.

After my first four months at SKAGEN, I see that there are various dimensions to our key strengths, and these can be illustrated as above.

Nine out of 11 ahead

2016 was a good year for the majority of our funds and most chief investment officers would be satisfied to see 9 out of 11 funds performing ahead of their benchmarks. Nevertheless, as an organisation we always want more for our unit holders and will continue to strive for the perfect score.

SKAGEN Kon-Tiki has beaten its benchmark 11 out of 15 years; we are behind over the last three years. The four best performing portfolio companies earned our unit holders two billion Norwegian kroner in 2016. These were Cosan, a Brazilian diversified energy company, X5, a Russian supermarket chain, Samsung Electronics, a Korean technology company and Banrisul, a Brazilian bank. SKAGEN Kon-Tiki is starting to pull ahead again and the second half of 2016 was markedly better than the first half, with the fund ahead of its benchmark in the period. 2016 also marked the year when Kristoffer Stensrud chose to hand over

sole leadership of the fund to Knut Harald Nilsson. Knut Harald has managed the fund together with Kristoffer over the last 10 years.

SKAGEN Global, which turns 20 this year, has beaten its benchmark 15 out of 19 years. Over these almost twenty years, the fund has delivered a performance of over 14 percent per year. While 2015 was a good year for the fund where we were ahead of benchmark, we were not able to follow up this good performance in 2016. We were surprised by Brexit in the first half, and in the second half the rotation out of healthcare stocks and unfavourable company news led to weak performance from two pharma stocks in the portfolio, Roche and Teva. This is a harsh reminder that avoiding losers is crucial to good performance. As active fund managers, we know we will deviate from benchmark – both on the up- and downside. We are working hard to ensure that 2017 will be an “up” year.

I would like to emphasise that outper-

formance in SKAGEN Kon-Tiki and SKAGEN Global is our number one priority for 2017.

SKAGEN Vekst invests about half of its assets in the Nordics and the rest globally. The fund has grown twentyfold since its inception in 1993. In 2016, SKAGEN Vekst beat its benchmark, driven by its investments in companies like Oriflame, a Swedish cosmetics firm, Samsung Electronics and Norsk Hydro, a Norwegian aluminium company.

Our global property fund SKAGEN m2 also performed well in 2016. SKAGEN m2 had a few teething problems at inception four years ago, but a successful change of portfolio managers and a clean-up of the portfolio has put this fund firmly back on track. SKAGEN m2 is an exciting product for clients looking for international exposure to real estate.

Last, but not the least, I would like to review our latest equity fund family member, SKAGEN Focus. SKAGEN Focus is a global equity fund that has a very clearly

defined mandate and strategy. The fund delivered formidable performance last year, outperforming its benchmark by a significant margin.

SKAGEN offers several fixed income funds, a number of which have been part of the SKAGEN family for many years. Our fixed income funds consistently deliver excellent returns, not only against their benchmarks, but against competition as well. This is demonstrated by the 5 and 4 star ratings from Morningstar for SKAGEN Tellus and SKAGEN Avkastning, respectively.

You may read more about our fixed income and our equity funds in the portfolio updates in our Market Report.

A promising year

2017 promises to be an exciting year and the global economy is off to a good start. The US economy is strong, and a new president will be in place by the end of January. What this will mean for investors remains to be seen.

What we do know is that Europe is

expected to do better this year following a clean-up of Italian banks and better exports on the back of a weaker euro. The great unknown is the timeline and the effects of the UK activating Article 50 and starting the Brexit process. The British Prime Minister has signalled that the formal process will start at the end of March. With the British government in effect ending a half of a century of foreign and economic policy, European collaboration will surely be put to the test.

The spring months will also probably be filled with noise surrounding the election in France. Still, one should not be distracted from the fact that the US central bank may continue to raise interest rates. They already started to do so in December and have signalled that there may be more to come. Meanwhile, there are important events such as the German elections and China's Communist party congress scheduled for the second half of the year.

What President Trump will, or will not, do when it comes to protectionism is far

from clear. Will he use smoke and mirrors to achieve big headlines, or will he actually implement import taxes and export subsidies or other major measures that would hinder global trade? The current business climate in emerging markets is improving. A trade war would reverse this.

However, aside from these clouds, the skies have turned brighter in emerging markets. After several years of profits being downgraded due to high cost inflation and slow demand, emerging markets are now on the path to recovery. Costs are coming down and demand is picking up which is in itself very positive for the companies. Combining this with very low valuation, we may be in for positive equity performance in emerging markets. We believe they may turn out to be the best place to be in 2017; the combination of improving earnings and record low valuation is indeed potent.

Continued focus on ESG

In 2016 SKAGEN continued to increase its focus on sustainability in the funds.

It is gratifying to note that we have received good feedback on our increased focus on and clarification around how we integrate environmental, social and corporate governance factors (ESG) into our investment processes. The feedback has come from our clients, other players in the fund industry, consultants and the UN supported Principles for Responsible Investment (UN PRI).

It was also gratifying to be ranked joint third place in Morningstar's rating of Norwegian asset management companies within ESG. The overview from the international fund information supplier, Morningstar, was published on their Norwegian website and was based on their new Sustainability Rating. The number of globes allocated to a fund demonstrates how well a portfolio takes into account ESG factors in Morningstar's view.

SKAGEN has incorporated ESG factors

in the investment process for the past fifteen years. Amongst other things, this enables us to identify challenges before they escalate and consequently reduce the value of the funds' investments.

Sustainability and good governance can provide companies with competitive advantages and support value creation, which contributes to maximising returns over time to the benefit of our unit holders. The portfolio managers assess the sustainability in every holding to see whether it has relevance to the investment in the same way that they assess other analysis material.

Voting

During the course of 2016, SKAGEN voted in more shareholder meetings. During the year, there were a total of 248 votable shareholder meetings, with a total of 2 863 votable items on the agenda.

SKAGEN voted at 231 of these meetings, on 93 percent of the votable items. This is an increase from 86 percent in 2015.

In the meetings where we voted, 6.1 percent of the votes were against the company's management on one or more items on the agenda. This is a slight decrease from 7.6 percent at the end of 2015.

SKAGEN has, in line with our policy, typically voted against items related to:

- The issuance of equity without pre-emptive rights for existing shareholders
- Excessive management remuneration without links to results
- The election of board members who are not deemed sufficiently independent

Value creation

Governance

When we launched our new website in November 2015, we also added an online solution from Institutional Shareholder Services (ISS), which is the world's leading provider of corporate governance solutions. Our unit holders can now find out how the funds have voted in the companies they own the day after the votes have been cast. An explanation is available in the instances where we have voted against the company's management on general meeting ballot items.

Engagement

SKAGEN engages with the companies in our portfolios. The portfolio managers regularly speak with management in the companies where we are invested. We record the cases where we have had direct contact on a specific issue.

SKAGEN engaged with 13 companies on various ESG issues during the course

of 2016. One case worth mentioning is our interaction with Banco do Estado do Rio Grande do Sul, which for years has run the salary payments for government employees in the state of Rio Grande Do Sul. The state, which is the largest shareholder in the bank with a 57 percent stake, announced in January that they would start charging for the right to run the business.

The Brazilian Shareholder Association sent a letter voicing concerns over smaller shareholders' rights in this matter. The portfolio managers of the emerging markets fund SKAGEN Kon-Tiki contacted the bank about similar concerns, and sent a separate letter to management where we stated our view. The fund also supported the election of an independent member to the board in April.

Our newest fund, SKAGEN Focus, has been involved in two so-called proxy

fight between investors and key people in two companies, namely Stock Spirits and Omega Protein. We won in both cases. In addition we have continued to follow up on the engagement we have had with the UK-based security company G4S and were gratified to note that the company sold its operations in Israel in December.

At the end of 2016, we can therefore state that we are satisfied with the developments in this area. However, we work continuously to improve our sustainability policy. Our journey so far has taken us from the first rounds of reporting to UN PRI to an A-rating for the year 2015. New rounds of reporting are approaching and we look forward to developing further in order to maintain our good results.

Board of director's report for SKAGEN's Security Funds 2016

At the end of 2016, SKAGEN AS (SKAGEN) managed combined assets of NOK 83.3 billion divided between five equity funds, six fixed income funds, one combination fund, in addition to mirror funds and feeder funds. Nine out of our 11 equity and fixed income funds delivered positive returns in 2016; nine out of eleven outperformed their respective benchmark indexes.

SKAGEN's equity and combination funds in 2016

At the end of 2016, SKAGEN managed the equity funds SKAGEN Vekst, SKAGEN Global, SKAGEN Kon-Tiki, SKAGEN m2 and SKAGEN Focus, in addition to the combination fund SKAGEN Balanse. SKAGEN is an active manager. The return in the funds will therefore vary over time and should be assessed in a long-term perspective. Three of our equity funds outperformed their respective benchmark indexes last year.

At the end of 2016, SKAGEN managed total assets of NOK 76.8 billion in equity and combination funds, down from NOK 92.1 billion at the end of 2015. This reflects NOK 1.3 billion in value development and NOK 16.7 billion in net redemptions.

The market for index funds and smart beta has grown over recent years, to the detriment of active funds. This was one of the reasons why some of the equity funds experienced significant redemptions in 2016, of which 90 percent was on the part of institutional clients. Liquidity in the funds has not been challenged, however, and the redemptions have been handled in a routine manner.

SKAGEN's fixed income funds in 2016

At the end of the year, SKAGEN managed the bond funds SKAGEN Avkastning, SKAGEN Tellus and SKAGEN Credit and the money market funds SKAGEN Høyrente, SKAGEN Høyrente Institusjon and SKAGEN Krona. All of the fixed income funds beat their benchmark indexes in 2016.

At the end of 2016, SKAGEN managed total assets of NOK 6.6 billion in fixed income funds, down from 7.2 billion at the end of 2015. The change comes from NOK 100 million in value development and NOK 700 million from net redemptions.

Environmental, social and governance (ESG) factors

SKAGEN works actively with social, environmental and governance factors in our funds. We believe that companies with a healthy focus on ESG have a competitive advantage which in turn contributes to increased value creation. During the course of the year we have voted at 231 general meetings, on 93 percent of the votable items. On the items where we voted, we voted against the company's management (on one or more points) in 6.1 percent of the cases. SKAGEN typically votes against items related to the issuance of equity without pre-emptive rights for existing shareholders, excessive management remuneration without links to results and the election of board members who are not deemed sufficiently independent. Information about voting is published on our website. Together with other shareholders, SKAGEN got two new independent board members elected in two of our portfolio companies, and we have throughout 2016 been in active dialogue with 13 portfolio companies.

General risk associated with investing in securities funds

Investing in securities funds entails risk related to future value development. Invest-

tors may therefore receive higher or lower returns than expected, and may also make a loss on investments. Nevertheless, a general characteristic of securities funds, including SKAGEN's securities funds, is that risk is diversified across many different investments in different sectors and geographical regions. This diversification is expected to benefit clients over time and their returns should be higher relative to the risk of buying single stocks or bonds.

Risk management in SKAGEN's securities funds

SKAGEN monitors and measures risk in the securities funds in accordance with Norwegian laws and regulations. Each of the securities funds has a risk profile that is approved by the Board. The Board and the managing director regularly receive risk reports drawn up by the company's independent risk management function, which highlight relevant risk factors including market risk, credit risk and liquidity risk.

The value development of all of SKA-

GEN's securities funds was in line with the normal annual fluctuations and their respective risk profiles in 2016. Over time, the highest return is expected to come from the equity funds, somewhat lower return is expected from the bond funds and the lowest return from the money market funds. The equity fund SKAGEN m² invests in listed property companies and is expected to have a risk level and deliver a return between those of the other equity funds and the bond funds over time. That was the case in 2016.

Market risk

The risk in the funds' investments is divided between general market risk and specific risk linked to the individual investments. For both our equity and fixed income funds, the majority of the risk is associated with general market risk. Political and economic conditions, general interest rate developments and foreign exchange rate fluctuations are particularly pertinent to general market risk. When something unexpected happens, the

funds are typically affected almost as much as the rest of the market. Throughout 2016, political risk has been a more significant factor, particularly in relation to the Brexit referendum and the US presidential election. The specific risk associated with concrete investments is independent of other fluctuations. The specific risk is reduced by diversifying SKAGEN's portfolios, so that our securities funds as a whole are most exposed to general market risk.

Political risk is expected to continue in 2017, due to several important elections amongst other things. It is, however, worth noting that just a few days after the Brexit outcome in June and a few hours after the Trump victory in November, the downturn had become an upturn in the stock market. Presidential elections, terrorist attacks, natural disasters and other external shocks have not had a particularly lasting effect on the market over the past decade. That being said, short-term market fluctuations provide an active manager like SKAGEN with good opportunities, as we can use

BOARD OF DIRECTORS' REPORT

the fluctuations to our advantage. Whether the particular events in 2016 will have long lasting effects, it is too early to say. The most important issue is whether increased populism will result in higher inflation, and whether such a development would have an effect on interest rates. At the time of writing, we are seeing higher headline inflation as a result of increasing commodity prices. However, we have not yet seen any substantial change to core inflation.

Credit and counterparty risk

The fixed income funds' investments are based on analyses of each issuer's creditworthiness and the economic, macro political and institutional circumstances of the country in which the bond is issued. Credit risk is reduced by increasing demands in terms of credit worthiness and type of issuer. Counterparty risk is reduced by seeking delivery on payment and by keeping a close eye on brokers' credit ratings and/or market credit premium as well as accounts.

Liquidity risk

SKAGEN's securities funds are also exposed to liquidity risk, i.e. the risk that the funds' investments cannot be converted to cash within an expected timeframe or at an expected price. Liquidity risk may occur if, for example, certain securities are not frequently traded in the market. The risk is limited by monitoring the volumes sold,

having an extensive counterparty network as well as the possibility to trade outside the market. In addition, certain cash reserves are maintained.

Operational risk

Fund management also entails operational risk, typically associated with inadequate or failing internal processes or systems, human error or external events. Operational risk is managed by, amongst other things, maintaining focus on good processes, routines and systems, continuous training of employees, communication measures as well as updating and drawing lessons from event registers. Incidents and near-misses are evaluated twice a year in an internal control process involving the managers responsible for all areas of activity.

Administrative conditions

In 2016, SKAGEN starting using a proprietary system to manage unit holder registration and settlement in the funds. The board is satisfied that the transition from VPS went as planned, with no particular remarks from the Norwegian Financial Services Authority. Thanks to our new system, we can now provide our clients in Norway and abroad with a significantly better and more flexible technical solution.

Alexandra Morris was appointed new Investment Director on 1 September 2016. She has 20 years' experience as analyst,

portfolio manager and latterly as Investment Director at DNB. She is SKAGEN's first investment director focused solely on this one role.

In the autumn of 2016, SKAGEN started a reorganisation process in order to adapt the organisation to changing market conditions, assets under management and strategy. This process is expected to be completed in the spring of 2017.

Øyvind Schanke takes up the role as new Managing Director of SKAGEN on 1 February 2017, and replaces Leif Ola Rød, who has led SKAGEN since 2014. Schanke joins SKAGEN from a position as the Chief Investment Officer for Asset Strategies for Norway's Government Pension Fund Global (the "oil fund") and has 21 years of experience from the finance industry. The board would like to thank Leif Ola Rød for his solid contribution to SKAGEN.

The securities funds have no employees. The company does not pollute the environment. All the securities funds are managed by SKAGEN and have Handelsbanken as their custodian. SKAGEN is located in Stavanger, Norway.

Going concern

The Board confirms that the premise of the funds and the management company as going concerns continues to be fulfilled.

General notes 2016

NOTE 1: ACCOUNTING PRINCIPLES

All figures in NOK 1,000 unless otherwise stated.

The accounts for 2016 are prepared in accordance with the Norwegian accounting law and regulation for annual financial statements for securities funds.

Financial instruments:

All financial instruments, such as shares, bonds, certificates and interest rate swaps, are valued at fair value (market value).

Determination of fair value:

Securities are valued at market prices as of 30.12.2016.

Bonds and notes, for which there are no "marketmaker" prices, are at all times valued against the applicable credit spreads and yield curve.

Unlisted equities are valued according to the latest trading price, value adjustments made by brokers and/or internal valuations.

Currency exchange rates:

Securities and bank deposits/overdrafts in foreign currency are valued at the prevailing exchange rate at the time of pricing 30.12.2016

Treatment of transaction costs:

Transaction costs related to purchase of financial instruments (broker's fees and other fees) are booked as part of the cost price of the instruments and follow the principle of realisation.

Allocated to unitholders for reinvestment:

Net taxable income in the fixed income funds, comprised of interest income, realised capital gain/loss and other income with deduction of management fee and transaction-related custodian costs, is distributed to the unit holders as the issue of new units as of 31.12.2016. For SKAGEN Krona and SKAGEN Credit SEK the distribution to the unit holders as the issue of new units is done as of 19.12.2016.

All distribution to unit holders in fixed income funds are treated as allocations of profit in accordance with the regulation for annual financial statements for securities funds. Distribution from fixed income funds are accounted for by entering reinvestments as new units in the fund in the financial year.

NOTE 2: FINANCIAL DERIVATIVES

SKAGEN Credit holds interest rate derivatives. A more detailed description is given in the SKAGEN Credit notes. The other funds have not held financial derivatives during the year.

NOTE 3: FINANCIAL MARKET RISK

Through investment in Norwegian and foreign businesses, the equity funds are exposed to share price, currency exchange and liquidity risks. The fixed income funds are exposed to interest and credit risks and liquidity risks. Furthermore, the fixed income funds are exposed to currency risks in those cases where the funds invest in currencies other than the fund's functional currency.

Overview of funds which have functional currency other than NOK:

	Functional currency
SKAGEN Krona	SEK
SKAGEN Credit SEK	SEK
SKAGEN Credit EUR	EUR

In addition to laws, regulations and articles of association regulating the risks in the funds, the funds are managed with a conscious focus on company-specific risks related to the companies constituting the funds' portfolios.

NOTE 4: TURNOVER RATE

The turnover rate is a measure related to the average duration of the investments in the fund. The turnover rate is calculated as whichever is the smaller amount of either purchases and sales of securities in the portfolio during the year, divided by average assets under management during the year. The formula is an approach for calculating the funds' turnover rate.

The funds' turnover rate for the year 2016 was:

SKAGEN Vekst	26 %
SKAGEN Global	61 %
SKAGEN Kon Tiki	10 %
SKAGEN m ²	30 %
SKAGEN Focus	57 %
SKAGEN Balanse 60/40	18 %
SKAGEN Avkastning	21 %
SKAGEN Høyrente	49 %
SKAGEN Høyrente Institusjon	75 %
SKAGEN Tellus	71 %
SKAGEN Krona	380 %
SKAGEN Credit	34 %

For the feederfunds:

SKAGEN Credit NOK	For all feederfunds it is the turnover rate in the masterfund SKAGEN Credit which applies.
SKAGEN Credit SEK	
SKAGEN Credit EUR	

NOTE 5: SUBSCRIPTION FEE

There are no subscription or redemption fees for any of the funds.

NOTE 6: REFER TO PAGES 25 TO 38

SKAGEN Vekst Note 7, 8, 9, 10 and 11

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

As of 2016, transaction costs are booked as a part of the cost price of financial instruments and are included in the gain/loss calculation based on the realisation principle. The change in principle resulted in a booking of costs amounting to TNOK 5,432 associated with the existing securities portfolio. The equity capital in the fund is unchanged as a result of the new practice, since the portfolio is valued at market value and the unrealised profit/loss on the portfolio therefore changes accordingly from the same point in time.

The figures for 2015 have been revised to provide comparable figures.

Throughout 2016, the fund has paid TNOK 4,474 in broker's fees and other fees.

SKAGEN Vekst has only been charged transaction-related custodian costs and these are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

The fixed management fee is calculated for all classes in percent p.a. of the daily assets under management in the class as follows:

Unit class	Fixed management fee percent p.a.
A	1,0%
B	0,8%
C	0,6%

In addition, unit classes A and B are charged a variable management fee of 1/10 of the return above 6 percent p.a. measured in Norwegian kroner, as long as the unit value on 31.12 is more than the unit value the last time the fund was charged a variable management fee (high watermark). Unit class C is charged a variable management fee of 1/10 of the better value development in the unit value than the balanced and continually rebalanced index composed of the MSCI Nordic Countries IMI Index and the MSCI All Country World Index ex Nordic Countries (Daily Total Return Net \$ measured in Norwegian kroner). The variable management fee in class C is charged/calculated only if the accumulated relative value development from the previous charge/calculation up to and including 31 December is greater than zero.

Management fee allocated to the respective unit classes:

	2016			Total
	Unit class A	Unit class B	Unit class C	
Management fee - fixed	71 836	49	950	72 835
Management fee - variable	-	-	-	-
Total management fee	71 836	49	950	72 835

NOTE 9. EQUITY RECONCILIATION

	Class	31.12.2016	31.12.2015	31.12.2014
Number of units issued	A	3 585 360	3 972 933	4 671 239
Number of units issued	B	2 736	5 753	4 801
Number of units issued	C	3 163	141 003	-
Base price per unit (in NOK)*	A	2 076,7288	1 986,0307	1 847,7680
Base price per unit (in NOK)*	B	2 087,1972	1 992,0727	1 882,5363
Base price per unit (in NOK)*	C	2 094,2248	1 994,7290	-

*Base price is set at the end of the last working day of the year and is based on the best prevailing estimate. Finalised figures as of 31.12 are used in the annual financial statement. Consequently minor timing differences may occur. The sole difference between unit class A, unit class B and unit class C is related to the management fee, see note 8.

FINANCIAL STATEMENT

NOTE 10. TAX NOTE

Equity funds are, in principle, exempt from tax on gains and do not have the right to deduct losses on realisation of equities when calculating taxable income. Furthermore, dividends received from companies within the EU/EEA are, in principle, tax-exempt. However, 3 percent of dividends received from these companies are treated as taxable to Norway.

Dividends received from companies outside the EU/EEA are taxable. The funds may in addition be charged withholding tax on dividends received from all foreign companies.

The tax cost for the years 2016 and 2015 in SKAGEN Vekst is associated with withholding tax on foreign dividends.

NOTE 11. RISK AMOUNT (IN NOK)

RISK amount determined as of 01.01:

1994	1995	1996	1997	1998	1999	2000

SKAGEN Focus Note 7, 8, 9 and 10

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

As of 2016, transaction costs are booked as a part of the cost price of financial instruments and are included in the gain/loss calculation based on the realisation principle. The change in principle resulted in a booking of costs amounting to TNOK 1,491 associated with the existing securities portfolio. The equity capital in the fund is unchanged as a result of the new practice, since the portfolio is valued at market value and the unrealised profit/loss on the portfolio therefore changes accordingly from the same point in time.

The figures for 2015 have been revised to provide comparable figures.

Throughout 2016, the fund has paid TNOK 2,653 in broker's fees and other fees.

SKAGEN Focus has only been charged transaction-related custodian costs and these are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

The fixed management fee is calculated for all classes in percent p.a. of the daily assets under management in the class as follows:

Unit class	Fixed management fee percent p.a.
A	1,6%
B	1,3%
C	1,0%

In addition the three unit classes are charged a variable management fee of 1/10 better value development in the unit value than the benchmark index MSCI All Country World Daily Total Return Net \$ measured in Norwegian kroner. The variable management fee is calculated daily and charged yearly on 31 December for all three unit classes. In the event of poorer value development in the unit value than the benchmark index, 10 percent of the underperformance is deducted from the fixed management fee. The total management fee therefore has an upper and a lower limit, so the combined fee may not exceed 3.2 percent p.a. and may not be less than 0.8 percent p.a. of the average assets under management in unit classes A and C. In unit class B the corresponding upper limit is 2.9 percent p.a. and lower limit is 0.5 percent p.a.

Management fee allocated to the respective unit classes:

	2016			Total
	Unit class A	Unit class B	Unit class C	
Management fee - fixed	17 300	51	1 209	18 561
Management fee - variable	7 334	31	998	8 364
Total management fee	24 634	83	2 208	26 925

Tax payable is incorporated in other debt.

SKAGEN Focus was launched on 26.05.2015.

SKAGEN Global Note 7, 8, 9 and 10
NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

As of 2016, transaction costs are booked as a part of the cost price of financial instruments and are included in the gain/loss calculation based on the realisation principle. The change in principle resulted in a booking of costs amounting to TNOK 40,650 associated with the existing securities portfolio. The equity capital in the fund is unchanged as a result of the new practice, since the portfolio is valued at market value and the unrealised profit/loss on the portfolio therefore changes accordingly from the same point in time.

The figures for 2015 have been revised to provide comparable figures.

Throughout 2016, the fund has paid TNOK 40,452 in broker's fees and other fees.

SKAGEN Global has only been charged transaction-related custodian costs and these are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

The fixed management fee is calculated for all classes in percent p.a. of the daily assets under management in the class as follows:

Unit class	Fixed management fee percent p.a.
A	1,0%
B	0,8%
C	0,6%
D	0,5%

In addition all four unit classes are charged a variable management fee of 1/10 better value development in the unit value than the benchmark index MSCI All Country World Daily Total Return Net \$ measured in Norwegian kroner. The variable management fee is calculated daily and charged yearly on 31 December for unit classes A and B. For unit classes C and D, the variable management fee is calculated daily and charged quarterly, but the variable management fee for a given quarter may only be charged provided that the accumulated relative value development between the fund and the MSCI All Country World Daily Total Return Net \$ measured in Norwegian kroner from the previous charge up to and including the given quarter is greater than zero (high watermark).

Management fee allocated to the respective unit classes:

	2016				Total
	Unit class A	Unit class B	Unit class C	Unit class D	
Management fee - fixed	282 378	11 153	1 609	5	295 146
Management fee - variable	-	-	-	-	-
Total management fee	282 378	11 153	1 609	5	295 146

FINANCIAL STATEMENT

SKAGEN Kon-Tiki Note 7, 8, 9, 10 and 11

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

As of 2016, transaction costs are booked as a part of the cost price of financial instruments and are included in the gain/loss calculation based on the realisation principle. The change in principle resulted in a booking of costs amounting to TNOK 47,482 associated with the existing securities portfolio. The equity capital in the fund is unchanged as a result of the new practice, since the portfolio is valued at market value and the unrealised profit/loss on the portfolio therefore changes accordingly from the same point in time.

The figures for 2015 have been revised to provide comparable figures.

Throughout 2016, the fund has paid TNOK 25,517 in broker's fees and other fees.

SKAGEN Kon-Tiki has only been charged transaction-related custodian costs and these are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

The fixed management fee is calculated for all classes in percent p.a. of the daily assets under management in the class as follows:

Unit class	Fixed management fee percent p.a.
A	2,00 %
B	1,50 %
C	1,75 %
D	1,50 %
E	1,25 %

In addition the five unit classes are charged a variable management fee of 1/10 better value development in the unit value than the benchmark index MSCI Emerging Markets Index Daily Traded Net Total Return \$ measured in Norwegian kroner. In the event of poorer value development in the unit value than the benchmark index, 10 percent of the underperformance is deducted from the fixed management fee. The total management fee therefore has an upper and a lower limit, so the combined fee may not exceed 4 percent p.a. and may not be less than 1 percent p.a. of the average assets under management in unit classes A, C, D and E. In unit class B, the corresponding upper limit is 3.5 percent p.a. and lower limit is 0.5 percent p.a. The variable management fee is calculated daily and charged yearly on 31 December for all five unit classes.

Management fee allocated to the respective unit classes:

	2016					Total
	Unit class A	Unit class B	Unit class C	Unit class D	Unit class E	
Management fee - fixed	400 972	48 414	7 801	15 467	95 486	568 140
Management fee - variable	-37 081	-5 233	-1 095	-2 687	-10 389	-56 485
Total management fee	363 891	43 181	6 706	12 780	85 096	511 655

NOTE 9. EQUITY RECONCILIATION

Equity capital as of 01.01.2016	36 189 697
Issue of units 2016	3 387 630
Redemption of units 2016	-10 745 330
Distribution to unit holders 2016	-

Number of units issued	C	1 018 553	843 882	-
Number of units issued	D	906 149	2 000 282	-
Number of units issued	E	8 686 541	11 890 124	-
Base price per unit (in NOK)*	A	729,5223	684,8898	693,2737
Base price per unit (in NOK)*	B	738,0070	689,6829	694,9191
Base price per unit (in NOK)*	C	732,9878	686,5286	-
Base price per unit (in NOK)*	D	736,3176	688,1148	-
Base price per unit (in NOK)*	E	740,0434	689,9052	-

*Base price is set at the end of the last working day of the year and is based on the best prevailing estimate. Finalised figures as of 31.12 are used in the annual financial statement. Consequently minor timing differences may occur. The sole difference between the five unit classes is related to the management fee, see note 8.

NOTE 10. TAX NOTE

Equity funds are, in principle, exempt from tax on gains and do not have the right to deduct losses on realisation of equities when calculating taxable income. Furthermore, dividends received from companies within the EU/EEA are, in principle, tax-exempt. However, 3 percent of dividends received from these companies are treated as taxable to Norway.

Dividends received from companies outside the EU/EEA are taxable. The funds may in addition be charged withholding tax on dividends received from all foreign companies.

The tax cost for the years 2016 and 2015 in SKAGEN Kon-Tiki is associated with withholding tax on foreign dividends.

NOTE 11. RISK AMOUNT (in NOK)

SKAGEN m² Note 7, 8, 9 and 10

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

As of 2016, transaction costs are booked as a part of the cost price of financial instruments and are included in the gain/loss calculation based on the realisation principle. The change in principle resulted in a booking of costs amounting to TNOK 865 associated with the existing securities portfolio. The equity capital in the fund is unchanged as a result of the new practice, since the portfolio is valued at market value and the unrealised profit/loss on the portfolio therefore changes accordingly from the same point in time.

The figures for 2015 have been revised to provide comparable figures.

Throughout 2016, the fund has paid TNOK 828 in broker's fees and other fees.

SKAGEN m2 has only been charged transaction-related custodian costs and these are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

The fixed management fee is calculated for all classes in percent p.a. of the daily assets under management in the class as follows:

Unit class	Fixed management fee percent p.a.
A	1,5%
B	1,2%
C	1,0%

In addition all three unit classes are charged a variable management fee of 1/10 better value development in the unit value than the benchmark index MSCI ACWI Real Estate IMI Net Total Return USD measured in Norwegian kroner. In the event of poorer value development in the unit value than the benchmark index, 10 percent of the underperformance is deducted from the fixed management fee. The total management fee therefore has an upper and a lower limit such that the combined fee may not exceed 3 percent p.a. and may not be less than 0.75 percent p.a. of the average assets under management in unit classes A and C. In unit class B, the corresponding upper limit is 2.7 percent p.a. and lower limit is 0.45 percent p.a. The variable management fee is calculated daily and charged yearly on 31 December for all three unit classes.

Management fee allocated to the respective unit classes:

	2016			Total
	Unit class A	Unit class B	Unit class C	
Management fee - fixed	14 196	18	10	14 225
Management fee - variable	3 853	7	5	3 865
Total management fee	18 049	25	16	18 089

NOTE 9. EQUITY RECONCILIATION

Equity capital as of 01.01.2016	1 021 999
Issue of units 2016	210 212
Redemption of units 2016	-312 003

Base price per unit (in NOK)*	C	162,4716	154,5053	-

*Base price is set at the end of the last working day of the year and is based on the best prevailing estimate. Finalised figures as of 31.12 are used in the annual financial statement. Consequently minor timing differences may occur. The sole difference between the three unit classes is related to the management fee, see note 8.

NOTE 10. TAX NOTE

Equity funds are, in principle, exempt from tax on gains and do not have the right to deduct losses on realisation of equities when calculating taxable income. Furthermore, dividends received from companies within the EU/EEA are, in principle, tax-exempt. However, 3 percent of dividends received from these companies are treated as taxable to Norway.

Dividends received from companies outside the EU/EEA are taxable. The funds may in addition be charged withholding tax on dividends received from all foreign companies.

Calculation basis - tax payable	2016	2015
Net interest income	1 102	847
Taxable dividend	21 009	28 960

FINANCIAL STATEMENT

SKAGEN Balance 60/40 Note 7, 8, 9 and 10

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

The fund is only charged potential transaction-related custodian costs and the costs are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

SKAGEN Balance 60/40 is not charged a management fee but the underlying funds are charged management fees in accordance with the prospectus for each fund.

The applicable management fee in the underlying funds is as follows:

	Fixed fee in percent p.a. of the daily assets under management	Variable management fee
SKAGEN Avkastning	0,5%	-
SKAGEN Tellus, unit class A	0,8%	-
SKAGEN Høyrente	0,25%	-
SKAGEN Høyrente Institusjon	0,15%	-
SKAGEN Vekst, unit class A	1,0%	1/10 of return above 6 % p.a.
SKAGEN Global, unit class A	1,0%	*
SKAGEN Kon-Tiki, unit class A	2,0%	**

* 1/10 of better value development measured in percent in the fund's asset value compared with the benchmark index MSCI All Country World Daily Total Return Net \$, measured in Norwegian kroner.

** 1/10 of better value development in percent in the fund's asset value compared with the benchmark index MSCI Emerging Markets Index Daily Traded Net Total Return \$, measured in Norwegian kroner. In case of poorer value development in the fund's net asset value relative to the benchmark, 10 percent of the difference will be deducted from the fixed management fee. However the total management fee may not exceed 4 percent p.a. and may not be lower than 1 percent p.a. of average assets under management.

NOTE 9. EQUITY RECONCILIATION

Equity capital as of 01.01.2016	329 492

*Base price is set at the end of the last working day of the year and is based on the best prevailing estimate. Finalised figures as of 31.12 are used in the annual financial statement. Consequently minor timing differences may occur.

NOTE 10. TAX NOTE

The fixed income funds are taxable with 25 percent of net realised capital gain on interest-bearing securities and financial contracts, interest income accrued, currency gain/loss, minus tax-deductible costs, which, amongst other things, include accrued interest costs. The taxable net profit is in principle distributed among unitholders so that the fund is in a non-taxpaying position.

NOTE 11. CURRENCY RISK

SKAGEN Credit does not use any kind of instruments to reduce currency risk.

NOTE 12. INTEREST RATE RISK

SKAGEN Credit holds interest rate swaps to reduce the interest rate risk in the fund. The risk is reduced by reducing the duration. The fund enters into contracts where the fixed interest rate is swapped by floating interest rate. The principal amount in the contracts will not be settled and consequently they are not booked in the fund's balance sheet. It is only the net receivable/obligation which is booked in the accounts. Note 6 gives an overview of the interest rate swaps entered into as of end of year. Those contracts are representative of the contracts held by the fund during the year.

SKAGEN Credit EUR Note 7, 8, 9, 10 and 11 (in 1,000 EUR)

NOTE 7. CUSTODIAN COSTS, BROKER'S FEES AND OTHER FEES

The fund is only charged transaction-related custodian costs, some are charged directly and some indirectly through the master fund. The costs are charged to expenses at the time of the transaction.

NOTE 8. MANAGEMENT FEE

SKAGEN Credit EUR is part of a master-feeder structure and SKAGEN Credit EUR is a feeder fund. SKAGEN Credit is the master fund. The management fee in SKAGEN Credit EUR constitutes 0.8 percent p.a. of daily assets under management in unit class A and 0.45 percent p.a. in unit class B.

Management fee allocated to the respective unit classes:

Allocated to unit holders for reinvestment	-939
Expected reinvestment related to allocation for reinvestment	939
Equity capital as of 31.12.2016	48 424

	31.12.2016	31.12.2015	31.12.2014
Number of units issued	498 643	206 165	274 786
Base price per unit (in SEK)*	97,0587	92,5348	97,4753

*Base price is set at the end of the last working day of the year and is based on the best prevailing estimate. Finalised figures as of 31.12 are used in the annual financial statement. Consequently minor timing differences may occur.

NOTE 10. TAX NOTE

The fixed income funds are taxable with 25 percent of net realised capital gain on interest-bearing securities, interest income accrued, currency gain/loss, minus tax-deductible costs, which, amongst other things, include the management fee. The taxable net profit is in principle distributed among unitholders so that the fund is in a non-taxpaying position.

NOTE 11. CURRENCY RISK

SKAGEN Credit SEK does not use currency hedging instruments against the Swedish krone, but has as of 31.12.2016 overdrafts in USD, EUR, GBP and NOK bank accounts in order to reduce the currency exposure in their share of the underlying US dollar, euro, British pounds sterling and Norwegian krone investments in the master fund SKAGEN Credit.

SKAGEN Vekst

³⁾ For liquidity in the portfolio as of 31.12.2016, please refer to the balance sheet.

²⁾ REITs (Real Estate Investment Trusts) are listed, legal structures which are subject to favourable tax regulations in their country of origin. Conditional to receiving favourable tax treatment, the company must fulfil minimum requirements related to property exposure and a minimum share of the profits must be shared between owners.

Allocation of the acquisition cost:

For SKAGEN m2 the FIFO principle is applied when calculating the realised capital gain/loss when selling securities.

Portfolio key figures													
Yield	1,91 %												
Yield to clients ¹⁾	1,66 %												
Duration ²⁾	0,09												

¹⁾ Yield adjusted for management fee.

All securities are traded in the Norwegian market.

²⁾ Duration is a simplified expression of how much the price of the security will change if the interest rate changes by one percentage point.

Unit price as of 30.12.2016 NOK 102,1952

³⁾ Yield is the average annual return of an interest bearing security until maturity.

TNOK 37.738 is allocated for distribution to unitholders.

⁴⁾ Securities are divided into six risk classes according to their credit risk.

This will result in a reduction in the unit price equal to the distribution per unit at the time of distribution.

Class 1 has the lowest and class 6 the highest credit risk.

Risk class 1: Supranational organisations
 Risk class 2: Government, and government guaranteed within the EEA
 Risk class 3: Government, and government guaranteed outside the EEA
 Risk class 4: County and local government
 Risk class 5: Bank and financial institutions
 Risk class 6: Industry

⁵⁾ For liquidity in the portfolio as of 31.12.2016, please refer to the balance sheet.

Allocation of the acquisition cost:

For SKAGEN Høyrente the FIFO principle is applied when calculating the realised capital gain/loss when selling securities.

SKAGEN Høyrente Institusjon

TOTAL SECURITIES PORTFOLIO ⁵⁾

1348958 6705 1349444 1356150 487 90,20 %

Portfolio key figures

Yield	2,29 %
Yield to clients ¹⁾	1,79 %
Duration ²⁾	1,31

¹⁾ Yield adjusted for management fee.

All securities are traded in a telephone-based international market.

²⁾ Duration is a simplified expression of how much the price of the security will change if the interest rate changes by one percentage point.

Unit price as of 30.12.2016 NOK 141,4966

³⁾ Yield is the average annual return of an interest bearing security until maturity.

TNOK 48.581 is allocated for distribution to unit holders. This will result in a reduction in the unit price equal to the distribution per unit at the time of distribution.

⁴⁾ Securities are divided into six risk classes according to their credit risk.

Class 1 has the lowest and class 6 the highest credit risk.

Risk class 1: Supranational organisations

Risk class 2: Government, and government guaranteed within the EEA

Risk class 3: Government, and government guaranteed outside the EEA

Risk class 4: County and local government

Risk class 5: Bank and financial institutions

Risk class 6: Industry

⁵⁾ For liquidity in the portfolio as of 31.12.2016, please refer to the balance sheet.

Allocation of the acquisition cost:

For SKAGEN Avkastning the FIFO principle is applied when calculating the realised capital gain/loss when selling securities.

SKAGEN Tellus

Yield	0,23%												
Yield to clients ¹⁾	0,03%												
Duration ²⁾	0,22												

¹⁾ Yield adjusted for management fee.

²⁾ Duration is a simplified expression of how much the price of the security will change if the interest rate changes by one percentage point.

³⁾ Yield is the average annual return of an interest bearing security until maturity.

⁴⁾ Securities are divided into six risk classes according to their credit risk.

Class 1 has the lowest and class 6 the highest credit risk.

Risk class 1: Supranational organisations

Risk class 2: Government, and government guaranteed within the EEA

Risk class 3: Government, and government guaranteed outside the EEA

Risk class 4: County and local government

Risk class 5: Bank and financial institutions

Risk class 6: Industry

⁵⁾ For illiquidity in the portfolio as of 31.12.16, please refer to the balance sheet.

Allocation of the acquisition cost:

For SKAGEN Krona the FIFO principle is applied when calculating the realised capital gain/loss when selling securities.

All securities are traded in the Swedish market.

Unit price as of 30.12.2016

SEK100,0922

TSEK1.163 is issued to unit holders.

In the event of distribution, this will result in a reduction in the unit price equal to the distribution per unit at the time of distribution.

SKAGEN Credit

Independent Auditor's Report

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of the mutual funds, which comprise the balance sheet as at 31 December 2016, the income statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies. The income statements are showing the following results for the year ended at December 31, 2016:

SKAGEN Vekst	NOK	272 238 590
SKAGEN Global	NOK	- 845 576 835
SKAGEN Kon-Tiki	NOK	1 788 406 374
SKAGEN m ²	NOK	38 906 334
SKAGEN Balanse	NOK	7 636 174
SKAGEN Focus	NOK	160 138 449
SKAGEN Avkastning	NOK	44 906 014
SKAGEN Høyrente	NOK	61 792 892
SKAGEN Høyrente Institusjon	NOK	11 829 762
SKAGEN Tellus	NOK	- 4 758 560
SKAGEN Krona	SEK	828 965
SKAGEN Credit	NOK	6 944 642
SKAGEN Credit NOK	NOK	9 054 361
SKAGEN Credit SEK	SEK	2 094 192
SKAGEN Credit EUR	EUR	547 309

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the mutual funds as at 31 December 2016, and its financial performance for the year then ended in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway.

Basis for Opinion

We conducted our audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, included International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the mutual funds as required by laws and regulations, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

PricewaterhouseCoopers AS, Kanalsletta 8, Postboks 8017, NO-4068 Stavanger

State authorised public accountants, members of The Norwegian Institute of Public Accountants, and authorised accounting firm

Other information

Management is responsible for the other information. The other information comprises the Board of Directors' report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of The Board of Directors for the Financial Statements

The Board of Directors (management) is responsible for the preparation and fair presentation of the financial statements in accordance with the Norwegian Accounting Act and accounting standards and practices generally accepted in Norway, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the mutual funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern. The financial statements use the going concern basis of accounting insofar as it is not likely that the enterprise will cease operations.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with laws, regulations, and auditing standards and practices generally accepted in Norway, including International Standards on Auditing (ISAs), we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error. We design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the mutual funds' internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the mutual funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the mutual funds to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit

Report on Other Legal and Regulatory Requirements

Opinion on the Board of Directors' report

Based on our audit of the financial statements as described above, it is our opinion that the information presented in the Board of Directors' report concerning the financial statements, the going concern assumption, and the proposal for the allocation of the profit in each mutual fund is consistent with the financial statements and complies with the law and regulations.

Opinion on Registration and Documentation

Based on our audit of the financial statements as described above, and control procedures we have considered necessary in accordance with the International Standard on Assurance Engagements (ISAE) 3000, *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*, it is our opinion that management has fulfilled its duty to produce a proper and clearly set out registration and documentation of the mutual funds' accounting information in accordance with the law and bookkeeping standards and practices generally accepted in Norway.
